

An expertly engineered, table-top, Bean to Cup machine that combines proven technology with rugged dependability, designed for the most demanding installations.

The Roma's 'true' espresso brewing system boasts a fully adjustable grinder to produce the perfect espresso time after time from your choice of beans.

The standard push button strength adjuster allows each cup to be brewed to your individual taste.

By using professional quality granulated milk and hot chocolate ingredients, a single Roma machine can produce a wide range of coffee shop quality drinks at the touch of a button.

Traditionally supplied in 'Classic Black' the Roma is now also available in 'Rich Copper', 'Smooth Chrome' and 'Mellow Gold' finishes.

Standard Features Include:
